

Mandatory Water Use Restrictions End

The Vista Irrigation District has declared an end to Level 2 conditions and returned to Level 1. The move was made in response to the State Water Resources Control Board terminating water use reduction mandates as well as the District's water wholesaler, the San Diego County Water Authority, rescinding its water supply allocations. The return to Level 1 is effective immediately.

The Level 2 condition included mandatory water use restrictions including limiting landscape watering to 2 days per week and 10 minutes per sprinkler station. These restrictions are no longer in effect with the return to Level 1. However, mandatory water-use efficiency practices, such as watering landscape in the early morning and evening hours, eliminating run-off, not using water to wash down paved surfaces and repairing leaks in a timely manner, remain in place with the return to Level 1.

The District would like to thank its customers for their conservation efforts during California's historic multi-year drought. District customers have reduced their water use by 19 percent since June 2015, beating the District's state mandated conservation standard of 12 percent. Although the District has ended mandatory water use restrictions, the District asks its customers to continue to use water wisely as water use efficiency plays an essential role in helping the District manage its water supplies.

Water Use Efficiency Practices

- Residents, businesses and nurseries/commercial growers water before 8 a.m. and after 8 p.m.
- Hand watering is permitted at any time.
- No watering landscapes during or 48 hours after it rains.
- No washing down of paved surfaces except for health and safety purposes.
- Eliminate water waste resulting from inefficient landscape irrigation and run off.
- Wash vehicles with a bucket or a hand-held hose with positive shut-off nozzle.
- Serve/refill water in restaurants only upon request.
- Offer guests in hotels/motels the option of not laundering towels and linens daily.
- Repair all water leaks within 48 hours.

UPDATE YOUR EMERGENCY CONTACT INFO WITH US

Please take a moment and provide us with a telephone number (or telephone numbers) where you can be reached in case of an emergency. Having updated information allows us to contact you quicker during a situation that affects your water supply. You can update your emergency contact number(s) by emailing or calling Customer Service at (760) 597-3120. When providing your updated telephone number(s) via email, please include your name and address or account number. Feel free to give us your work, home and cell phone numbers. Thank you for helping us keep you informed.
