METER REDUCTION REQUEST

Directions: Owner to complete Section I and have Fire Department complete Section II. Submit completed sections to Vista Irrigation District (VID) for approval. Once approved, VID will process this request on a separate Service Change Application.

I, Owner, hereby direct District to reduce my existing _____" meter to a 3/4" meter. By reducing my meter size, I am relinquishing all equity in the larger meter being removed. I understand that there is a cost to the District to downsize my meter, and it is my responsibility to reconnect the private side of my waterlines to the new meter (see current fee schedule on our website at https://www.vidwater.org/engineering-information for fees*).

It is also my responsibility to verify that this water meter does not serve fire protection equipment and that the existing meter size is not required for fire protection purposes.

In order to re-install a larger water meter, application must be made to District at which time the meter installation and the difference in the VID Capacity fees, San Diego County Water Authority Capacity fees, and all applicable fees* must be paid. I understand that there is a cost to re-establish service at today's rates. Contact the Engineering Department at (760) 597-3116 for the approximate cost (*fees subject to change).
