

RESOLUTION NO. 2026-17

RESOLUTION OF THE BOARD OF DIRECTORS
OF VISTA IRRIGATION DISTRICT AMENDING THE DISTRICT'S
WATER SUPPLY RESPONSE PROGRAM

WHEREAS, article 10, section 2 of the California Constitution declares that waters of the State are to be put to beneficial use; that waste, unreasonable use, or unreasonable method of use of water be prevented; and that water be conserved for the public welfare; and

WHEREAS, conservation of current water supplies and minimization of the effects of water supply shortages are essential to the public health, safety and welfare; and

WHEREAS, regulation of the time of certain water use, manner of certain water use, design of rates, method of application of water for certain uses, and installation and use of water-saving devices, provide an effective and immediately available means of conserving water; and

WHEREAS, California Water Code sections 375 et seq. authorize water suppliers to adopt and enforce a comprehensive water conservation program; and

WHEREAS, the Board of Directors of Vista Irrigation District (District) amended its Drought Response Conservation Program and renamed it the Water Supply Response Program on June 1, 2011, and amended the Water Supply Response Program adopted on May 27, 2015 as part of the District's 2015 Urban Water Management Plan; and amended the Water Supply Response Program adopted on June 16, 2021 as part of the District's 2020 Urban Water Management Plan; and

WHEREAS, amendment and enforcement of a comprehensive water conservation program will allow the District to delay or avoid implementing measures such as water rationing or more restrictive water use regulations pursuant to a declared water shortage emergency as authorized by California Water Code sections 350 et seq.; and

WHEREAS, San Diego County is a semi-arid region and local water resources are scarce. The region is dependent upon imported water supplies provided by the San Diego County Water Authority (Water Authority), which obtains a substantial portion of its supplies from the Metropolitan Water District of Southern California. Because the region is dependent upon imported water supplies, weather and other conditions in other portions of this State and of the Southwestern United States affect the availability of water for use in San Diego County; and

WHEREAS, the Water Authority has an Urban Water Management Plan that includes water conservation as a necessary and effective component of the Water Authority's programs to provide a reliable supply of water to meet the needs of the Water Authority's 22 member public agencies, including the District. The Water Authority's Urban Water Management Plan also includes a contingency analysis of actions to be taken in response to water supply shortages. This resolution is consistent with the Water Authority's Urban Water Management Plan; and

WHEREAS, as anticipated by its Urban Water Management Plan, the Water Authority, in cooperation and consultation with its member public agencies, has established a program for responding to water supply limitations. This resolution is intended to be consistent with the Water Authority's Water Shortage Contingency Plan; and

WHEREAS, this resolution contains six levels and corresponding actions that will assist the District in meeting conservation targets; and

WHEREAS, the District, due to the geographic and climatic conditions within its territory and its dependence upon water imported and provided by the Water Authority, may experience shortages due to drought conditions, regulatory restrictions enacted upon imported supplies and other factors. The District has adopted an Urban Water Management Plan that includes water conservation as a necessary and effective component of its programs to provide a reliable supply of water to meet the needs of the public within its service territory. The District's Urban Water Management Plan also includes a contingency analysis of actions to be taken in response to water supply shortages. This resolution is consistent with the Urban Water Management Plan adopted by the District; and

WHEREAS, the water-use efficiency practices, water conservation measures and progressive restrictions on water use and method of use identified by this resolution provide certainty to water users and enable the District to control water use, provide water supplies, and plan and implement water management measures in a fair and orderly manner for the benefit of the public; and

WHEREAS, a public hearing was held upon the proposed amended Water Supply Response Program (also referred to as Water Shortage Contingency Plan) at the Board of Directors meeting on June 17, 2026, at which all present were given an opportunity to be heard on the proposed amended Water Supply Response Program; and

WHEREAS, the Board of Directors has considered the proposed amended Water Supply Response Program and the evidence and testimony presented at the June 17, 2026 public hearing.

NOW, THEREFORE, the Board of Directors of Vista Irrigation District does resolve as follows:

ARTICLE ONE: The Water Supply Response Program is amended and restated, in its entirety as follows:

SECTION 1.0 DECLARATION OF NECESSITY AND INTENT

(a) This resolution establishes water management requirements necessary to conserve water, enable effective water supply planning, assure reasonable and beneficial use of water, prevent waste of water, prevent unreasonable use of water, prevent unreasonable method of use of water within the District in order to assure adequate supplies of water to meet the needs of the public, and further the public health, safety, and welfare, recognizing that water is a scarce natural resource that requires careful management not only in times of drought, but at all times.

(b) This resolution establishes regulations to be implemented at all times including during times of declared water shortages or declared water shortage emergencies. It establishes six levels of actions, with increasing restrictions on water use in response to worsening water supply conditions and decreasing available supplies.

(c) During Levels 1 through 6, all water-use efficiency practices, water conservation measures and water use restrictions are mandatory and become increasingly restrictive in order to attain escalating conservation goals.

(d) During all Levels, violations of water-use efficiency practices, water conservation measures and water use restrictions established by this resolution are subject to criminal, civil, and administrative remedies and penalties, including fees specified in this resolution.

SECTION 2.0 DEFINITIONS

(a) The following words and phrases whenever used in this chapter shall have the meaning defined in this section:

1. “Grower” refers to those engaged in the growing or raising, in conformity with recognized practices of husbandry, for the purpose of commerce, trade, or industry, or for use by public educational or correctional institutions, of agricultural, horticultural or floricultural products, and produced: (1) for human consumption or for the market, or (2) for the feeding of fowl or livestock produced for human consumption or for the market, or (3) for the feeding of fowl or livestock for the purpose of obtaining their products for human consumption or for the market. “Grower” does not refer to customers who purchase water subject to the Water Authority’s Permanent Special Agricultural Water Rate program.

2. “District” means Vista Irrigation District

3. “Water Authority” means the San Diego County Water Authority.

4. “Metropolitan” means the Metropolitan Water District of Southern California.

5. “Person” means any natural person, corporation, public or private entity, public or private association, public or private agency, government agency or institution, school district, college, university, or any other user of water provided by the District.

6. “Plan” means the District’s Urban Water Management Plan.

7. “Annual Assessment” means the Annual Water Supply and Demand Assessment submitted by the District each year to the State of California to determine the short term water reliability for the upcoming fiscal year.

8. “DWR” means the State of California Department of Water Resources.

9. “WSRP” means the District’s Water Supply Response Program.
10. “WSCP” means Water Shortage Contingency Plan which is analogous to the District’s Water Supply Response Program.
12. “State Board” means the State of California Water Resources Control Board.
13. “Functional turf” means a ground cover surface of turf located in a recreational use area or community space. Turf enclosed by fencing or other barriers to permanently preclude human access for recreation or assembly is not functional turf.
14. “Homeowners’ association” means a nonprofit corporation or unincorporated association created for the purpose of managing a common interest development.
15. “Nonfunctional turf” means any turf that is not functional turf, and includes turf located within street rights-of-way and parking lots.
16. “Potable water” means water that is suitable for human consumption.
17. “Recreational use area” means an area designated by a property owner or a governmental agency to accommodate human foot traffic for recreation, including, but not limited to, sports fields, golf courses, playgrounds, picnic grounds, or pet exercise areas. This recreation may be either formal or informal.
18. “Common area” means that portion of a common interest development or of a property owned or managed by a homeowners’ association or a community service organization or similar entity that is not assigned or allocated to the exclusive use of the occupants of an individual dwelling unit within the property.
19. “Common interest development” means any of the following:
 - (a) A community apartment project.
 - (b) A condominium project.
 - (c) A planned development.
 - (d) A stock cooperative.
20. “Community service organization or similar entity” means a nonprofit entity, other than an association, that is organized to provide services to residents of the common interest development or to the public in addition to the residents, to the extent community common area or facilities are available to the public. “Community service organization or similar entity” does not include an entity that has been organized solely to raise moneys and contribute to other nonprofit organizations that are qualified as tax exempt under Section 501(c)(3) of the Internal Revenue Code and that provide housing or housing assistance.

21. “Community space” means an area designated by a property owner or a governmental agency to accommodate human foot traffic for civic, ceremonial, or other community events or social gatherings.

22. “Disadvantaged community” means a community with an annual median household income that is less than 80 percent of the statewide annual median household income.

SECTION 3.0 APPLICATION

(a) The provisions of this resolution apply to any person in the use of any water provided by the District.

(b) This resolution is intended to maintain efficient water use practices and to further the conservation of water. It is not intended to implement any provision of federal, State, or local statutes, resolutions, or regulations relating to protection of water quality or control of drainage or runoff. Refer to the local jurisdiction or Regional Water Quality Control Board for information on any stormwater resolutions and stormwater management plans.

(c) Nothing in this resolution is intended to affect or limit the ability of the District to declare and respond to an emergency, including an emergency that affects the ability of the District to supply water.

(d) The provisions of this resolution do not apply to use of water from private wells or to recycled water.

(e) Nothing in this resolution shall apply to use of water that is subject to a special supply program, such as the Water Authority’s Permanent Special Agricultural Water Rate. Violations of the conditions of special supply programs are subject to the penalties established under the applicable program. A person using water subject to a special supply program and other water provided by the District is subject to this resolution in the use of the other water.

(f) When the General Manager has determined that the District’s water supply is in a water emergency condition, everyone shall be required to reduce water consumption as prescribed by the General Manager.

(g) The General Manager shall have the authority and discretion to interpret and apply the provisions set forth in the Water Supply Response Program as long as the interpretations and applications of the measures meet the intent and goals of the Water Supply Response Program.

SECTION 4.0 LEVEL 1 – WATER EFFICIENCY

(a) Level 1 is also referred to as the “Water Efficiency” level. Level 1 applies at all times and up to and including 10 percent water shortage, unless the District Board of Directors has declared another level, per the procedures set forth in this resolution. Level 1 is designed to ensure customers use water efficiently and eliminate water waste at all times.

(b) At Level 1, the District will utilize its public education and outreach efforts to raise public awareness of the following mandatory water-use efficiency practices:

1. No washing down paved surfaces, including but not limited to sidewalks, driveways, parking lots, tennis courts, or patios, except when it is necessary to alleviate safety or sanitation hazards or to maintain, repair, construct/reconstruct streets.
2. No water waste resulting from inefficient landscape irrigation, such as runoff, low head drainage, or overspray, etc. Similarly, water shall not flow onto non-targeted areas, such as adjacent property, non-irrigated areas, hardscapes, roadways, or structures.
3. No irrigating residential or commercial landscapes during or within 48 hours following measurable rainfall.
4. Irrigate residential and commercial landscape with in-ground or hose-end sprinkler systems before 8 a.m. and after 6 p.m. only. Irrigation of new turf and/or plantings is exempt from these watering hour restrictions for a period of 30 days following the date of planting. Watering is permitted at any time with a hand-held hose equipped with a positive shut-off nozzle, a bucket, or when a drip/micro-irrigation system/equipment is used.
5. Irrigate nursery and commercial grower's products before 8 a.m. and after 6 p.m. only. Watering is permitted at any time with a hand-held hose equipped with a positive shut-off nozzle, a bucket, or when a drip/micro-irrigation system/equipment is used. Irrigation of nursery propagation beds is permitted at any time. Watering of livestock is permitted at any time.
6. Use potable water taken through construction meters to irrigate landscape before 8 a.m. and after 6 p.m. Watering is permitted at any time with a hand-held hose equipped with a positive shut-off nozzle, a bucket, or when a drip/micro-irrigation system/equipment is used.
7. Irrigate landscape outside of newly constructed homes and buildings in a manner that is consistent with regulations or other requirements established by the California Building Standards Commission and the Department of Housing and Community Development.
8. Use re-circulated water to operate ornamental fountains.
9. Wash vehicles using a bucket and a hand-held hose with positive shut-off nozzle, mobile high pressure/low volume wash system, or at a commercial site that re-circulates (reclaims) water on-site. Avoid washing during hot conditions when additional water is required due to evaporation.
10. Serve and refill water in restaurants and other food service establishments only upon request.

11. Offer guests in hotels, motels, and other commercial lodging establishments the option of not laundering towels and linens daily.
12. Repair all water leaks within 48 hours of notification by the District unless other arrangements are made with the General Manager.
13. Use recycled or non-potable water for construction purposes when available.
14. The use of potable water for the irrigation of nonfunctional turf located on commercial, industrial, and institutional properties, other than a cemetery, and on properties of homeowners' associations, common interest developments, and community service organizations or similar entities is prohibited as of the following dates:
 - (a) All properties owned by the Department of General Services, beginning January 1, 2027.
 - (b) All properties owned by local governments, local or regional public agencies, and public water systems, except those specified in paragraph (5), beginning January 1, 2027.
 - (c) All other institutional properties and all commercial and industrial properties, beginning January 1, 2028.
 - (d) All common areas of properties of homeowners' associations, common interest developments, and community service organizations or similar entities, beginning January 1, 2029.
 - (e) All properties owned by local governments, local public agencies, and public water systems in a disadvantaged community, beginning January 1, 2031, or the date upon which a state funding source is made available to fund conversion of nonfunctional turf on these properties to climate-appropriate landscapes, whichever is later.
 - (f) Notwithstanding subdivision 14, the use of potable water is not prohibited by this section to the extent necessary to ensure the health of trees and other perennial non-turf plantings, or to the extent necessary to address an immediate health and safety need.
 - (g) The State Board may, upon a showing of good cause for reasons including economic hardship, critical business need, and potential impacts to human health or safety, postpone a compliance deadline in subdivision (a) by up to three years for certain persons, institutions, and businesses, and may create a form to be used for compliance certification to the board by property owners.

SECTION 5.0 LEVEL 2 – WATER CONSERVATION

(a) A Level 2 may be declared under the following conditions: 1) when the Water Authority notifies its member agencies that due to cutbacks caused by drought or other reduction in supplies, a consumer demand reduction is required in order to have sufficient supplies available to meet anticipated demands; 2) when a consumer demand reduction is required by a regulatory agency; or 3) when other conditions exist that require a consumer demand reduction. The consumer demand reduction amounts in Level 2 typically apply during a shortage of up to and including 20 percent, although the District Board of Directors may declare Level 2 and implement the mandatory Level 2 conservation measures identified in this resolution to achieve a consumer demand reduction of a different amount. The General Manager shall have the authority and discretion to implement water conservation measures commensurate with the level of demand reduction required and/or the reduction targets achieved, as described in Section 5 (b) below. The General Manager shall inform the Board of Directors of the status of the implementation of the measures set forth in this section and the resulting water conservation in a timely manner.

(b) All persons using District water shall comply with Level 1 water-use efficiency practices during Level 2, and shall also comply with the following additional mandatory conservation measures:

1. Stop watering ornamental turf in public street medians with potable water.
2. Irrigate residential and commercial landscape with in-ground or hose-end sprinkler systems before 8 a.m. and after 6 p.m. only.
3. Irrigate nursery and commercial grower's products before 8 a.m. and after 6 p.m. only. Watering by nurseries and commercial growers is permitted at any time with a hand-held hose equipped with a positive shut-off nozzle, a bucket, or when a drip/micro-irrigation system/equipment is used. Irrigation of nursery propagation beds is permitted at any time. Watering of livestock is permitted at any time.
4. Irrigation of landscape on a construction project with potable water taken through a construction meter before 8 a.m. and after 6 p.m. only.
5. Limit residential and commercial landscape irrigation to assigned days per week and limited duration times on a schedule established by the General Manager and posted by the District. This section shall not apply to commercial growers or nurseries for water that they use for agricultural purposes.
6. Limit lawn watering and landscape irrigation using in-ground or hose-end sprinklers to time limits per watering station per assigned day as established by the General Manager and posted by the District. This provision does not apply to landscape irrigation systems using drip/micro-irrigation systems and stream rotor sprinklers.

7. Turf and/or plant establishment is allowed if required by a landscape permit or necessary for erosion control, landscape renovation after a natural disaster, or establishment, repair or renovation of public use fields for schools or parks. New turf and/or plantings are exempt from irrigation limitations set forth in sections 4 (b) (3) (4), 5 (b) (1) and 5 (b) (2) for a period of 30 days following the date of planting.

8. Water landscaped areas, including trees and shrubs located on residential and commercial properties, and not irrigated by a landscape irrigation system, before 8 a.m. and after 6 p.m. only by using a bucket, hand-held hose with positive shut-off nozzle, or low-volume non-spray irrigation per assigned day as established by the General Manager and posted by the District.

9. Commercial and agricultural customers are asked to implement all measures practicable toward improving efficiency and conserving water.

SECTION 6.0 LEVEL 3 – WATER SHORTAGE

(a) Level 3 may be declared under the following conditions: 1) when the Water Authority notifies its member agencies that due to increasing cutbacks caused by drought or other reduction of supplies, a serious water shortage condition exists that requires extensive consumer demand reductions in order to have sufficient supplies available to meet anticipated demands; 2) when a similar requirement is imposed by a regulatory agency; or 3) when other conditions exist that require a serious consumer demand reduction. The consumer demand reduction amounts in Level 3 typically apply during a shortage of up to and including 30 percent, although the District Board of Directors may declare Level 3 and implement the Level 3 conservation measures identified in this resolution to achieve a consumer demand reduction of a different amount. The General Manager shall have the authority and discretion to implement water conservation measures commensurate with the level of demand reduction required and/or the reduction targets achieved, as described in Section 6 (b) below. The General Manager shall inform the Board of Directors of the status of the implementation of the measures set forth in this section and the resulting water conservation in a timely manner.

(b) All persons using District water shall comply with Level 1 water-use efficiency practices and Level 2 water conservation practices during Level 3 and shall also comply with the following additional mandatory conservation measures:

1. Comply with any new residential and commercial landscape irrigation restrictions relative to assigned days per week and limited duration times on a schedule established by the General Manager and posted by the District.

2. Stop re-filling pools/spas more than one foot per week. Draining and re-filling of pools and spas is not permitted except to repair leaks or for health and safety reasons.

3. Stop filling or re-filling ornamental lakes or ponds, except to the extent needed to sustain aquatic life, provided that such animals are of significant value and have been actively managed within the water feature prior to declaration of another level under this resolution.

4. Stop operating ornamental fountains or decorative water features. These types of fountains and water features may be operated on a limited basis for maintenance purposes only. The operation of fountains and water features that do not use re-circulated water is prohibited.

5. Stop washing vehicles except at commercial car washes that re-circulate water, or by high pressure/low volume wash systems.

(c) Upon the declaration of Level 3, no new potable water service shall be provided, no new temporary meters or permanent meters shall be provided, and no statements of immediate ability to serve or provide potable water service (such as, will serve letters, certificates, or letters of availability) shall be issued, except under the following circumstances:

1. A valid, unexpired building permit has been issued for the project; or
2. The project is necessary to protect the public's health, safety, and welfare; or
3. The applicant participates in a District-approved demand offset program that produces or saves at least the same amount of water as is being used by the new development, prior to the issuance by the District of a new water meter or water meters for the project.

This provision shall not be construed to preclude the resetting or turn-on of meters to provide continuation of water service or to restore service that has been interrupted for a period of one year or less.

(d) Upon the declaration of Level 3, District will suspend consideration of annexations to its service area.

(e) The District may establish a water allocation for property served by the District using a method that does not penalize persons for the implementation of conservation methods or the installation of water saving devices. If the District establishes a water allocation it shall provide notice of the allocation by including it in the regular billing statement for water service or by any other mailing to the address to which the District customarily mails the billing statement for fees or charges for on-going water service. Following the effective date of the water allocation as established by the District, any person that uses water in excess of the allocation shall be subject to a penalty for each billing unit of water in excess of the allocation. The penalty for excess water usage shall be cumulative to any other remedy or fee that may be imposed for violation of this resolution.

SECTION 7.0 LEVEL 4 – CRITICAL WATER SHORTAGE

(a) Level 4 applies under the following conditions: 1) when the Water Authority Board of Directors declares a water shortage emergency pursuant to California Water Code section 350 and notifies its member agencies that Level 4 requires a water shortage demand reduction in order for the District to maximize supplies available to meet anticipated demands; 2) when a similar

requirement is imposed by a regulatory agency; or 3) when other conditions exist that require the Board of Directors to declare a water shortage emergency. The consumer demand reduction amounts in Level 4 typically apply during a shortage of up to and including 40 percent, although the District Board of Directors shall declare a Level 4 water shortage in the manner and on the grounds provided in California Water Code section 350.

(b) All persons using District water shall comply with water-use efficiency practices and conservation measures required under Levels 1 through 3 and shall also comply with the following additional mandatory conservation measures:

1. Stop all commercial landscape irrigation, unless the District has determined that recycled water is available and may be lawfully applied to the use. This restriction shall not apply to the following categories of use.

A. Maintenance of trees and shrubs that are watered on the same schedule set forth in section 6 (b) (1) by using a bucket, hand-held hose with a positive shut-off nozzle, or low-volume non-spray irrigation;

B. Maintenance of existing landscaping necessary for fire protection as specified by the Fire Marshal of the local fire protection agency having jurisdiction over the property to be irrigated;

C. Maintenance of existing landscaping for erosion control;

D. Maintenance of plant materials identified to be rare or essential to the well-being of rare animals;

E. Maintenance of landscaping within active public parks and playing fields, day care centers, school grounds, cemeteries, and golf course greens, provided that such irrigation does not exceed two days per week according to the schedule established under section 6 (b) (1);

F. Watering of livestock; and

G. Public works projects and actively irrigated environmental mitigation projects.

H. Irrigation of crops and landscape products of commercial growers and nurseries.

2. Stop all vehicle washing, including at commercial car washes.

3. Repair all water leaks within 24 hours of notification by the District unless other arrangements are made with the General Manager.

SECTION 8.0 LEVEL 5 – WATER EMERGENCY

(a) Level 5 applies under the following conditions: 1) when the Water Authority Board of Directors declares a water shortage emergency pursuant to California Water Code section 350 and notifies its member agencies that Level 5 requires an emergency water demand reduction in order for the District to maximize supplies available to meet anticipated demands; 2) when a similar requirement is imposed by a regulatory agency; or 3) when other conditions exist that require the Board of Directors to declare a water shortage emergency. The consumer demand reduction amounts in Level 5 typically apply during a shortage of up to and including 50 percent, although the District Board of Directors shall declare a Level 5 water shortage in the manner and on the grounds provided in California Water Code section 350.

(b) All persons using District water shall comply with water-use efficiency practices and conservation measures required under Levels 1 through 4 and shall also comply with the following additional mandatory conservation measures:

1. Stop all residential landscape irrigation, unless the District has determined that recycled water is available and may be lawfully applied to the use. This restriction shall not apply to the following categories of use.

A. Maintenance of trees and shrubs that are watered on the same schedule set forth in section 7 (b) (1) by using a bucket, hand-held hose with a positive shut-off nozzle, or low-volume non-spray irrigation;

B. Maintenance of existing landscaping necessary for fire protection as specified by the Fire Marshal of the local fire protection agency having jurisdiction over the property to be irrigated;

C. Maintenance of existing landscaping for erosion control;

D. Maintenance of plant materials identified to be rare or essential to the well-being of rare animals; and

E. Watering of livestock.

SECTION 9.0 LEVEL 6 – CRITICAL WATER EMERGENCY

(a) Level 6 condition applies when the Water Authority Board of Directors declares a water shortage emergency pursuant to California Water Code Section 350 and notifies its member agencies that Level 6 requires a demand reduction of more than 50% in order for the District to have maximum supplies available to meet anticipated demands. The District shall declare a Critical Water Emergency in the manner and on the grounds provided in California Water Code section 350.

(b) All persons using District water shall comply with conservation measures required during Levels 1 through 5 conditions and shall also comply with the following additional mandatory conservation measures:

1. Stop all landscape irrigation, including maintenance of trees and shrubs, and crops and landscape products of commercial growers and nurseries at the General Manager's discretion. This restriction shall not apply to the following categories of use unless the District has determined that recycled water is available and may be lawfully applied to the use.

A. Maintenance of existing landscaping necessary for fire protection as specified by the Fire Marshal of the local fire protection agency having jurisdiction over the property to be irrigated;

B. Maintenance of existing landscaping for erosion control;

C. Maintenance of plant materials identified to be rare or essential to the well-being of rare animals;

D. Watering of livestock; and

E. Public works projects and actively irrigated environmental mitigation projects.

2. At the discretion of the General Manger, the District may shut off or lock irrigation meters without customer notification.

SECTION 10.0 PROCEDURES FOR DETERMINATION AND NOTIFICATION OF LEVEL OF ACTION

(a) Level 1 under this Program applies at all times unless the District Board of Directors has declared another Level, per the procedures set forth in this section. The District shall, at a minimum, provide notice of a Level 1 declaration and condition by news release and by posting information on the District's website.

(b) The existence of a Level 2 or Level 3 may be declared by resolution of the District Board of Directors adopted at a regular or special public meeting held in accordance with State law. The mandatory conservation measures applicable to Level 2 or Level 3 shall take effect on the tenth day after the date the response level is declared. Within five days following the declaration of the level, the District shall publish a copy of the resolution in a newspaper used for publication of official notices.

(c) The existence of Level 4, 5 or 6 may be declared in accordance with the procedures specified in California Water Code sections 351 and 352. The mandatory conservation measures applicable to Levels 4 through 6 shall take effect on the tenth day after the date the response level is declared. Within five days following the declaration of the level, the District shall publish a copy of the resolution in a newspaper used for publication of official notices. If the District establishes a water allocation, it shall provide notice of the allocation by including it in the regular billing statement for the fee or charge or by any other mailing to the address to which the District customarily mails the

billing statement for fees or charges for on-going water service. Water allocation shall be effective on the fifth day following the date of mailing or at such later date as specified in the notice.

(d) The District Board of Directors may declare an end to a level by the adoption of a resolution at any regular or special meeting held in accordance with State law.

(e) The District shall notify customers of any changes in levels or water use restrictions using multiple communication methods.

SECTION 11.0 NON-COMPLIANCE AND FEES

(a) Any person, who uses, causes to be used, or permits the use of water in violation of this resolution is guilty of an offense punishable as provided herein.

(b) Each day that a violation of this resolution occurs is a separate offense.

(c) Water Conservation Fees, as set forth in Section 4.4.17 of the District's Rules and Regulations, may be levied for each violation of a provision of this resolution as follows:

1. A first violation of any provision of this resolution shall result in a letter of warning.

2. A second violation of any provision of this resolution within one year shall result in the assessment of a Water Conservation Fee.

3. A third violation of this resolution within one year shall result in the assessment of an additional Water Conservation Fee.

4. Four or more violations of any provision of this resolution shall result in the assessment of additional Water Conservation Fees.

(d) Violation of a provision of this resolution is subject to enforcement through installation of a flow-restricting device in the meter. The cost of installing and removing a flow-restricting device will be paid for by the person, who uses, causes to be used, or permits the use of water in violation of this resolution.

(e) Each violation of this resolution may be prosecuted as a misdemeanor punishable by imprisonment in the county jail for not more than 30 days or by a fine not exceeding \$1,000, or by both as provided in Water Code section 377.

(f) Willful violations of the mandatory conservation measures and water use restrictions as set forth in Sections 7.0, 8.0 and 9.0 and applicable during Levels 4 through 6 may be enforced by discontinuing service to the property at which the violation occurs as provided by Water Code section 356. The cost of disconnecting and re-connecting water service be paid for by the person, who uses, causes to be used, or permits the use of water in violation of this resolution.

(g) All fees and costs associated with installing and removing a flow-restricting device and disconnecting and re-connecting water service will be added to the account of the person, who uses, causes to be used, or permits the use of water in violation of this resolution. Fees and costs will appear on and be payable with the first billing statement for the period the violation occurred and be subject to the same remedies that are imposed by the District for failure to pay other charges.

(h) All remedies provided for herein shall be cumulative and not exclusive.

SECTION 12.0 APPEALS

(a) Any person complaining about fees and/or other remedies applied in accordance with Section 11 of this resolution shall have that complaint be first taken up with the General Manager before any action will be taken by the District's Board of Directors.

(b) The General Manager's determination may be appealed in writing within 10 days of the mailing of a notice of determination. Any determination not timely appealed shall be final.

(c) The person appealing the General Manager's determination shall submit a written request to the Board Secretary to have his or her appeal considered as an item for discussion and action at an upcoming Board meeting. The written request shall include: 1) a description of the issues, 2) evidence supporting the claim, and 3) a request for resolution of the dispute.

(d) The District shall at least 10 days before the date of the hearing mail an appropriate notice of the regular or special meeting at which the appeal will be heard. The Board may, in its discretion, affirm, reverse or modify the determination.

ARTICLE TWO: Water Code Section 10632 requires water shortage planning elements contained in a water supplier's Plan be included in a water supplier's WSCP; this article sets forth those water shortage planning elements.

SECTION 1.0 WATER SUPPLY RELIABILITY ANALYSIS

Pursuant to Water Code Section 10632(a)(1), water suppliers are to provide a concise narrative summarizing the supplier's water reliability analysis in Chapter 7 of its 2025 Plan. The District has several water sources including both purchased and local water supplies. Purchased water supplies are conveyed to the District by Metropolitan and/or the Water Authority and may be derived from sources developed by either of those two agencies or through the auspices of the United States Department of the Interior, Bureau of Reclamation (Reclamation). Supplemental Water is supplied under the terms of the San Luis Rey Indian Water Rights Settlement Act, 16,000 AF/YR of water conserved from the lining of the All American Canal and its Coachella Branch is furnished by Reclamation for the benefit of the San Luis Rey Settlement Parties (Settlement Parties consist of the Bands – the La Jolla, Rincon, San Pasqual, Pauma, and Pala Bands of Mission Indians – and the Local Entities – the City of Escondido and the District). Per the Settlement Act, Supplemental Water may only be used by the Bands on their reservations or by the Local Entities in their service areas. Local water supply is managed as a surface water source from Lake Henshaw and the San Luis Rey River; the District augments the natural runoff into Lake Henshaw with

groundwater that is pumped into the lake from the Warner Valley Basin. Chapter 6 of the District’s 2025 Plan provides details on the District’s water sources and reliability of each of its sources.

To the extent that local water and Supplemental Water supplies are insufficient to meet its total water needs for any given year, the District relies on Water Authority supplies to make up the difference. Based on information contained in the Water Authority’s 2025 Plan, it is anticipated that the Water Authority will be able to meet the District’s increased demands during a single-dry water year and multiple-dry water year scenarios. Information regarding the reliability and vulnerability of the Water Authority’s and Metropolitan’s water supplies can be found in each agency’s 2025 Plan.

SECTION 2.0 ANNUAL WATER SUPPLY AND DEMAND ASSESSMENT PROCEDURES

Pursuant to Water Code Section 10632.1, water suppliers will be required to submit a water supply and demand assessment report (Annual Assessment) to DWR on or before July 1st of each year. The Annual Assessment will be used to evaluate short-term water supply reliability for the upcoming fiscal year and will discuss the District’s existing and projected water supply sources, unconstrained customer demand and planned water use for the current year assuming that the following year will be dry.

The District will perform its Annual Assessment in the spring each year to assess short-term reliability for the upcoming fiscal year. Results of the analysis will be inform the District’s WSRP level. Because the District purchases water from the Water Authority, the District’s Annual Assessment will be conducted in coordination with the Water Authority’s Annual Assessment. As such, the timeline for conducting the Annual Assessment has been based on the Water Authority’s timeline. The District’s timeline for developing its Annual Assessment is presented in Table 2-1.

Table 2-1: Annual Assessment Process and Timeline

Time Frame	Step	Action
March – April	1(a)	District estimates available local supplies.
	1(b)	District coordinates with the Water Authority to gather necessary information for the Authority to conduct its wholesaler assessment.
April – May	2(a)	The Water Authority announces member agency allocation determination for current year.
	2(b)	The Water Authority determines carryover (and emergency storage apportionments if under emergency).
	2(c)	District conducts its Annual Assessment:
	(i)	District determines total available supply – inclusive of imported water supply.
	(ii)	District determines infrastructure constraints (including water quality conditions limiting local sources).
	(iii)	District determines expected demand for current year and one subsequent dry year, anticipated to be based on regional projections from the Water Authority .
	(iv)	District compares supply and demand and makes a determination of water supply reliability.
June	3(a)	District coordinates with the Water Authority on submittal of the report. Annual Assessment report to be submitted to the state by July 1.

SECTION 3.0 SIX STANDARD WATER SHORTAGE LEVELS AND RESPONSE ACTIONS & SEISMIC RISK ASSESSMENT AND MITIGATION PLAN

Pursuant to Water Code sections 10632(a)(3) and 10632(a)(4), the District must include six standard water shortage levels and response actions correspond to normal conditions to progressively increasing estimated shortage conditions (up to 10%, 20%, 30%, 40%, 50%, and greater than 50% shortage compared to the normal reliability condition). These shortage levels and corresponding actions can be found in sections 4-10 of the District’s WSRP.

Water Code Section 10632.5 requires an urban water supplier to include within its Plan a seismic risk assessment and mitigation plan to assess the vulnerability of each of the various facilities of a water system and mitigate those vulnerabilities. Pursuant to Water Code Section 10632.5(c), an urban water supplier may comply with this requirement by submitting a copy of the most recently adopted multi-hazard mitigation plan under the federal Disaster Mitigation Act of 2000 (Public Law 106-390) if the multi-hazard mitigation plan addresses seismic risk. Appendix F of the District’s 2025 Plan contains the District’s Hazard Mitigation Plan which includes sections addressing seismic risk assessment and mitigation.

SECTION 4.0 COMMUNICATION PROTOCOLS

Water Code Section 10632 requires every urban water supplier to establish communication protocols to inform the public of water shortages and water shortage actions. Upon a water shortage declaration action by the General Manager, the District will expand its public information campaign to notify the public of the water shortage rules and regulations. If possible, the District would activate a public information campaign prior to a formal water shortage declaration to provide customers with as much advance notice as possible. The District would issue a news release and would continually update its webpage to notify residents of current and planned shortages. Additionally, the District could direct mail a copy of the water shortage rules and regulations to its customers.

SECTION 5.0 COMPLIANCE AND ENFORCEMENT

Pursuant to Water Code 10632(a)(6), retail suppliers must include an element that describes how they will ensure compliance with and enforce provisions of the WSCP. In the District’s WSRP, Sections 11 and 12 establish customer compliance, enforcement and appeal procedures.

SECTION 6.0 LEGAL AUTHORITIES

The District has the legal authority to implement and enforce its WSCP (or WSRP). California Constitution Article 10, Section 2 states that the water resources of the State be put to beneficial use to the fullest extent of which they are capable and that the waste or unreasonable use or unreasonable method of use of water be prevented, and that the conservation of such waters is to be exercised with a view to the reasonable and beneficial use thereof in the interest of the people and for the public welfare. Sections of Water Code Chapter 3 commencing with Section 350 of Division 1, provide the authority for the governing body of a water agency to declare a water shortage and to adopt and enforce water conservation restrictions.

SECTION 7.0 FINANCIAL CONSEQUENCES

In the event of the District implementing a WSRP response action, appropriate conservation measures would go into effect and the District would be operating with reduced water sales. The amount of decreased water sales would depend on the WSRP response level and any additional state mandatory restrictions.

The District maintains several reserve funds including the Working Capital Reserve. The Working Capital Reserve is to protect the District's ability to have enough funds to meet its most basic and common financial obligations against operating revenue and expense variances such as reduced water sales and/or increased operating expenses. This reserve could be used to offset reduced sales or increased expenses. In addition to this reserve, the District has a comprehensive budget development process and rate modeling capabilities that enable the District to effectively balance revenue and expenditure requirements. The District also undertakes a comprehensive cost-of-service process every four to five years to ensure the water rates are sufficient to meet operational, capital and reserve needs.

SECTION 8.0 MONITORING AND REPORTING

Pursuant to Water Code Section 10632(a)(9), the District will monitor and report on implementation of their WSCP during a shortage action. The methods for determining actual water use reductions are implemented on an ongoing basis. All water received, local and purchased, is metered and monitored; additionally, the District has meters in place that measure and record the water used by each connection within its service area. When water use restrictions are in place, and specifically when water cutbacks have been implemented, the District closely monitors water use to ensure compliance with restrictions and that the District is meeting its necessary consumer demand reductions. Because the District collects water use data on a regularly scheduled basis, it can calculate a baseline to compare to current water use during times of drought, which can then be used to estimate actual reductions in water use.

SECTION 9.0 WSRP REFINEMENT PROCEDURES

Pursuant to Water Code Section 10632(a)(10), the District will reevaluate and improve procedures for systematically monitoring and evaluating the functionality of the WSRP in order to ensure shortage risk tolerance is adequate and appropriate water shortage mitigation strategies are implemented as needed.

The WSRP is a living document that has been and will be refined to be responsive to the effectiveness of conservation measures during a water shortage. The District will analyze monthly monitoring data to determine if adaptive measures need to be taken to achieve the necessary shortage reduction amounts. In the event that measures are not working as desired, the District may modify actions or refine current actions to achieve greater savings.

ARTICLE THREE: CALIFORNIA ENVIRONMENTAL QUALITY ACT

Based on a review of the record as a whole, the Board of Directors hereby finds and determines that the actions in this Resolution are not subject to California Environmental Quality Act (CEQA) pursuant to Water Code Section 10652 because CEQA does not apply to the preparation and adoption or implementation of the actions taken pursuant to such WSRP. Because this Resolution comprises the adoption of the District's WSRP and involves its implementation, no CEQA review is required.

ARTICLE FOUR: This resolution shall take effect immediately upon adoption or as otherwise established by State law for Vista Irrigation District.

PASSED AND ADOPTED by the following roll call vote of the Board of Directors of Vista Irrigation District this 17th day of June, 2026:

AYES:	Nuñez, Kuchinsky, Sanchez, MacKenzie and Miller
NOES:	None
ABSTAIN:	None
ABSENT:	None

Marty Miller, President

ATTEST:

Ramae Ogilvie, Secretary
Board of Directors
Vista Irrigation District
